

Gross Weigh Bagging Scales

EQUIPMENT SALES | PARTS | MANUFACTURING

JEM International manufactures and sells more gross bagging units than any other company **worldwide**...the greatest value in the bagging industry!

Our gross weigh baggers weigh all free flowing materials into paper, cloth polywoven, or plastic bags with guaranteed accuracies. They have a minimum of moving parts for maximum efficiency and lower maintenance. They are delivered pre-calibrated to your particular product ready for immediate installation and use. Flex-Belt feeders and Auger feeders are available to handle products that are not free flowing in nature.

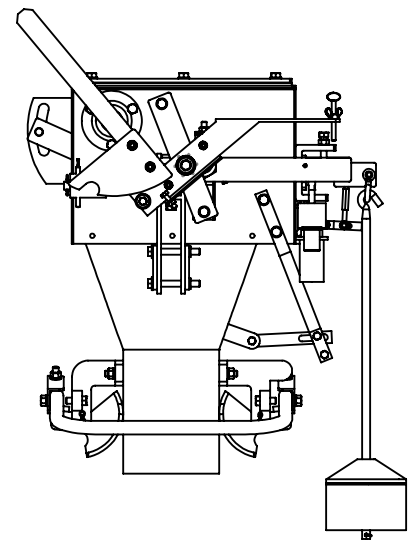

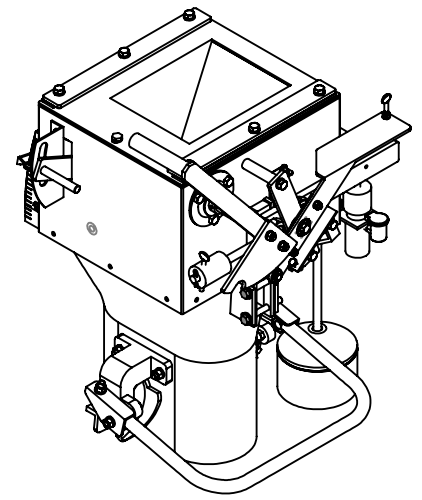

GWM Wolverine Gross Weigh Mechanical Bagging Scale

The GWM Wolverine provides an economical approach to filling bags from 10 lbs. to 110 lbs. (5 kg – 50kg).

Typical production speeds are 4-5 bags per minute at ± 4 ounce (100 gram) accuracy.

The GWM scales can be supplied with a variety of spout sizes to accommodate your specific bag dimensions. The scales are available in mild 10 gauge steel or can be supplied with stainless steel product contact surfaces or all stainless steel construction for corrosive or food grade products such as salt, fertilizer and various food products
